

NEXLINK® READY TO SHIP SERIES

Featuring the 6th generation Intel® Core™ i5 Processor

Get amazing performance and stunning visuals with the Nexlink® Ready to Ship Series (RTS) Desktop based on the 6th generation Intel® Core™ i5 processor. This desktop system offers new capabilities and functionality in performance, graphics, and security for advanced users.

CORPORATE PRODUCTIVITY

The Nexlink Ready to Ship Series is designed for business users who need to get more work out of their desktop PC. With upgraded memory capacity and the capability to deliver video to two independent displays this series is an intelligent choice for your business needs.

LONG LIFECYCLE

The Nexlink Ready to Ship Series is purpose built for Small-Medium Business clients who need a consistent, manageable and customizable system. Featuring a Corporate Stable Motherboard (CSM) which provides a lengthy 24 month product cycle allowing IT staff and business buyers peace of mind. Enhanced memory capacity enables the Nexlink RTS to perform more work and maintain its functionality throughout the product lifecycle. Delivering solid performance from the 6th generation Intel® Core™ i5 processor, this series is the right solution for the most demanding workplace tasks.

» 5 Year Warranty Optional

Buying on a budget does not have to mean forsaking a business cycle warranty. Maintain your business clients peace of mind with comprehensive warranty coverage for up to five years from the date of purchase.

» Legacy Support

Have older printers or serial connect devices that your business runs on? This series features headers for both parallel printers and serial connectivity. There is no need to upgrade your legacy peripherals when you replace your desktops.

» Dual Display

Increase business productivity up to 30% by adding a second or third screen. The RTS Series supports dual independent displays with DVI and VGA connections enabling business users to maintain legacy displays and integrate newer displays.

» Mainstream Performance

Providing a balance between core count and processing speed, the 6th generation Intel® Core™ i5 processor allows multiple applications to run effectively at one time. This quad core processor provides advanced users a performance advantage for the corporate workflow.
